PROFILE

I am a Computer Engineering graduate from Tribhuvan University, with expertise in full-stack development. I have successfully handled multiple projects both independently and as part of a team. Currently, I am working as a Junior Developer at Smart Innovations

EDUCATION

Bachelor in Computer Engineering

Advanced College of Engineering & Management

2019 – 2024 | Kathmandu, Nepal

PROFESSIONAL EXPERIENCE

Junior Full Stack Developer

Smart Innovations 

2024-08 – present

kathmandu, Nepal

As a Junior Developer at Smart Innovation, I had the opportunity to contribute to real-world industry projects across the full development lifecycle. My responsibilities included:

- Requirement analysis, planning, designing, and developing both frontend and backend services.
- Developing RESTful APIs and integrating them with backend systems.
- Working extensively with MongoDB for database operations.
- Collaborating on projects using modern technologies such as:
 - React, JavaScript, TypeScript
 - Node.js, Express.js
 - Tailwind CSS, Next.js, Postman
- Regularly deploying and updating projects using Netlify, Render and Docker .
- Gaining hands-on experience and foundational knowledge in AWS during this period.

This experience significantly strengthened my full-stack development skills and improved my ability to work in agile, collaborative environments

Junior React Developer

Digisoft Developers

2025-01 – 2025-03

Kathmandu, Nepal

As a Junior React Developer at Digisoft Developers, I had the opportunity to work on both industry and government projects, contributing across various stages of the development lifecycle. My key responsibilities included:

- Performing requirement analysis, planning, UI/UX designing, and frontend development.
- Testing and integrating APIs, and ensuring seamless connectivity with backend systems.
- Updating and maintaining existing systems and software solutions.
- Utilizing tools and technologies such as:
 - React, JavaScript, TypeScript
 - Tailwind CSS, Next.js, Postman , Swagger
- Deploying and providing daily updates via Netlify.

This role strengthened my expertise in frontend development, enhanced my API integration and testing skills, and gave me practical experience in delivering scalable solutions in both private and public sectors.

Internship

Goldenduck Enterprises

2023-09 – 2023-11
Kathmandu, Nepal

As an Intern Frontend Developer at GoldenDuck Enterprises, I worked includes primarily on improving the usability and design of existing systems. My key contributions included:

- Updating and enhancing existing system designs to improve usability and visual appeal.
- Proposing new UI/UX design ideas aimed at making systems more user-friendly and efficient.

This internship deepened my understanding of user-centered design and gave me valuable experience full stack development.
